(54) ORGANIC EL DISPLAY

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an organic EL display including a red color light emission layer with an improved light emitting efficiency.

SOLUTION: The organic EL display comprises a first electrode, a second electrode, and a light emitting layer laid between those electrodes having a guest material and at least one or less than two kinds of host materials for red color emission material. Either one of those host materials contains a material shown by the formula, and either one of host materials is substituted or non-substituted quinoline derivative.
